

CASE STUDY Pink Ribbon House

Client: Levitt Partnership Ltd.

Project: 650 sq.ft. garage

Coating: Xpedite Custom Design

Location: Houston, Texas

We were selected for Houston's 5th Pink Ribbon House® —a designer showcase home built to “raise the roof” for breast cancer research. The \$2.7 million dollar home is located in the city of Hunters Creek Village.

The Pink Ribbon House® involves the construction of a luxury home, designed with all the latest new home advantages and decorated in the finest design traditions. Funds are raised through home tours, corporate and individual sponsorships, and activities leading up to the tours, which now take place in the spring every two years.

We provided our Xpedite Custom Design garage floor coating with a Portabello frame and two heavily broadcasted areas in Cafe Mocha. The partitions were done with a wheat color base coat. An overall polyurea topcoat protects the whole floor. These colors blend with the house providing a balanced design.
